PROFESSIONAL SUMMARY

Detail-oriented Quality Assurance Engineer and SDET with over 10 years of experience driving software reliability across e-commerce, POS systems, enterprise APIs, and mobile platforms. Proven track record of transitioning manual testing environments into robust automated pipelines to accelerate deployment cycles. Expertise in building test frameworks using Python and Selenium, alongside establishing CI/CD integrations. Adept at aligning technical quality with business goals, earning multiple performance awards for exceptional problem-solving and cross-functional collaboration.

TECHNICAL SKILLS

- **Test Automation & Performance:** Python, Selenium, Appium, JMeter
- **API & Backend Testing:** Postman, RESTful API integrations
- **Test Management & CI/CD:** JIRA, TestRail, GitHub Actions, Git/Version Control
- **Testing Methodologies:** Agile Software Development, Automated Test Development, Manual Testing, Performance Testing, Integration Testing, Cross-Platform Compatibility

PROFESSIONAL EXPERIENCE

Sr. Quality Assurance Engineer | ***Tabsquare.AI*** **Dec 2021 – Sep 2026**

- Spearheaded quality assurance for high-volume enterprise products including Order Service (API), Smartweb, SmartTerminal, and SmartKiosk.
- Designed and executed comprehensive automated and manual smoke tests for new builds, ensuring zero-defect deployments into live production environments.
- Collaborated directly with software development teams to isolate root causes of complex defects, significantly streamlining the bug resolution process in JIRA during Agile testing cycles.
- Led technical product demonstrations for enterprise customers and stakeholders, showcasing new functionality and ensuring alignment on product capabilities.
- **Key Achievement:** Recognized for outstanding technical contribution and dedication, winning the Tabsquare Extra-mile award consecutively in 2022, 2023, and 2024.

Sr. Supervisor Quality Assurance | ***Erajaya Group*** **Jul 2019 – Nov 2021**

- Directed QA strategy and testing life cycles for major retail and e-commerce platforms, including iBox.co.id, eraspace.com, and internal Point of Sales (POS) systems.
- Developed, maintained, and executed comprehensive test plans using TestRail for web and mobile software applications to ensure high-performance consumer experiences.
- Supervised daily QA operations and mentored testing teams, enhancing workflow efficiency and strict adherence to company release policies.

Sr. Quality Tester | ***Alegrium.io*** **Mar 2016 – Jun 2019**

- Managed end-to-end testing for high-traffic mobile titles including *Cash, Inc.*, *Icon Pop Quiz 2*, and *Almighty Fantasy*.
- Assessed application performance and cross-platform compatibility across a wide matrix of mobile devices and OS versions to maintain rigorous quality standards.
- Facilitated and analyzed playtesting sessions, translating user feedback into actionable data for product management and development teams.

Jr. Quality Tester | ***Batavian Studio*** **Oct 2015 – Feb 2016**

- Created detailed test plans aligned with complex game design specifications to ensure thorough testing coverage for the PC title *Grimm Odds*.
- Tested new software features, levels, and mechanics across various platforms, documenting bugs and tracking them to resolution.
